Annealing/toughening

Annealing lehr suppliers' guide	253	7
Annealing lehr trends and developments	249	7
Chemical strengthening by ion exchange	265	7
Development and manufacture of car windscreens	387	9
Enhanced production flexibility	266	7
Measuring coated glass temperatures with infrared pyrometers	271	7
Safety glazing definitions, standards, production methods and uses	267	7
Technical ceramics for glass annealing and toughening	273	7
Thermal expansion: Its importance and practical aspects	260	7
Twenty down . . . Two products to go	517	12

Annual review of the European glass industry

After seven good years, turnover high but static	311	8
Comments from Eastern Europe	305	8
EEC glass container trends	293	8
German glass sector performance	299	8
Growing container demand in Greece	317	8
Improved Austrian export performance	299	8
Looking to the future of glass packaging	313	8
Model scheme recycling success	326	8
News from the British Society of Scientific Glassblowers	317	8
Patent glazing sets the standard	326	8
Planning and investment pay off for Sisecam	301	8
Poised for further European success	307	8
Qglass for quality, for Sweden	315	8
Relocation and expansion for Northern Ireland crystal manufacturer	308	8
Swedes set production and export expansion goals	296	8
UK glass industry trends	295	8
Urgent action required on skilled staff shortages	319	8
USA glass and ceramic industry prepares for new regulatory era	323	8
Western glass container industry faces the opening of Eastern Europe	307	8

Batch plant

Batch metering, weighing and mixing	136	4
Luxembourg float glass batch plant success	129	4
Maximum glass quality . . . The goal of modern batch plants	123	4
Metal separator for cullet processing	139	4
Pipe conveyor option for materials transportation	133	4

Coatings

Approved to European auto glazing standards	385	9
Blank mould precoatings update	457	11
Container coating — Improved quality and reduced costs	19	1
Economic alternative to batch colouration and decorating processes	463	11
Evolution of DC sputter coating of architectural, auto and optical glasses	13	1

Cold end handling

From cold end to loading . . .	31	1
News from the marketplace	380	9
Palletisers: Requirements, problems and solutions	379	9

Company profile

Automatic development for semi-auto specialist	196	5
Balanced expansion of hand-made crystal operations	225	6
Combustion engineering services	236	6
European expansion for Japanese TV manufacturer	232	6
High speed train demands top quality glass	386	9
Hot melt line first for UK	438	10
Newcomer reports growing international acceptance for glass container lubricants	461	11
North American developments now offered in Europe	175	5
Planning and investment pay off for Sisecam	301	8
PPG in the aircraft transparency business	391	9
Precision manufacture for flat screen developments	245	7
Recuperator system specialisation	430	10
Relocation and expansion for Northern Ireland crystal manufacturer	308	8
Second float line enhances production flexibility in Turkey	361	9
Strategic investment completed in Scottish glass container plant	450	11
Tableware production capacity increased by 75%	242	7

Compressed air

Compressed air safety and reliability	432	10
Computer-controlled compressors come of age	382	9
Heat from thin air	194	5

Confederation news

Evolving policies and services for the future	96	3
UK glass industry trends	295	8

Conference report

Commitment to continued success for the champagne of packaging	7	1
Glassmakers urged to reconsider the designer's role	509	12
Implications of COSHH regulations on the UK glass industry	32	1
Mould technology developments	34	1

Decoration

Colour can help spandrel glass producers	473	11
Decal decorating: Problems and solutions	468	11
Diamonds bring extra sparkle to Waterford	477	11
Economic alternative to batch colouration and decorating processes	463	11
Glass frosting via screenprinting	469	11
Increased flexibility with removable vitreous decals	471	11
Miniature temperature controls for colour printing	73	2
Robotic engraving project	73	2
Rockware upgrades dedicated decorating facility	480	11
Screenprinting with thermoplastic (hot melt) inks on glass and ceramics	150	4
Storing and mixing enamel pastes	475	11
USA glass and ceramic industry prepares for new regulatory era	323	8

Design

Student designs on show	440	10
Student work on show	35	1

Domestic glassware production

Automatically made by hand	25	1
Automatic development for semi-auto specialist	196	5
Automatic stemware production	27	1
Balanced expansion of hand-made crystal operations	225	6
Control and drive system developments	185	5
Crystal glassmaker reconsiders traditional pot furnace design	413	10
Decal decorating: Problems and solutions	468	11
Diamonds bring extra sparkle to Waterford	477	11
Economic alternative to batch colouration and decorating processes	463	11
Glassmakers urged to reconsider the designer's role	509	12
Improved Austrian export performance	299	8
Increased flexibility with removable vitreous decals	471	11
Miniature temperature controls for colour printing	73	2
Paste mould alternative	72	2
Relocation and expansion for Northern Ireland crystal manufacturer	308	8
Small series production of blown ware	180	5
Swedes set production and export expansion goals	296	8
Tableware and cavity ID — Inspection possibilities	51	2
Tableware production capacity increased by 75%	242	7

Emergency power

Combined heat and power option	70	2
How brittle is your power supply?	69	2

Integrated inspection machines, on-line data acquisition and production monitoring 215 6
Inspection equipment — A system overview 56 2
Looking to the future of glass packaging 313 8
Newcomer reports growing international acceptance for glass container lubricants 461 11
North American developments now offered in Europe 175 5
Problem-solving approach to hot glass handling 375 9
Quality information management for glass container manufacturers 209 6
Robotic dimensional checking of glass containers 431 10
Rockware upgrades dedicated decorating facility 480 11
Small series production of blown ware 180 5
Stand-alone electronic pusher 175 5
Strategy investment completed in Scottish glass container plant 450 11
Sweepout pocket design 376 9
Tableware and cavity ID — Inspection possibilities 51 2
Western glass container industry faces the opening of Eastern Europe 307 8

Glassfibre

Optimistic outlook for continuous fibre products 145 4

Health and safety

Implications of COSHH regulations on the UK glass industry 32 1
Lubrication practices must meet health/safety and pollution standards 453 11
Safety emphasis for glass in furniture 515 12

Hot glass handling

Hot glass handling in the 1990s 365 9
Problem-saving approach to hot glass handling 375 9
Sweepout pocket design 376 9
Vibratory cullet quenchers 368 9

Insulation

Insulating for fuel savings 152 4

Lubrication

Autoswabbing improves overall efficiency 460 11
Blank mould lubricant development gives cleaner, brighter containers 459 11
Blank mould precoatings update 457 11
Glassmaker's approach to mould lubrication 455 11
Lubrication practices must meet health/safety and pollution standards 453 11
Newcomer reports growing international acceptance for glass container lubricants 461 11

Melting technology

Batch and cullet chargers for glass furnaces 419 10
Coal-fired cyclone melting system 407 10
Combustion equipment improvements 423 10
Combustion engineering services 236 6
Crystal glassmaker reconsiders traditional pot furnace design 413 10
Electrode holder improvements 422 10
Furnace construction on fast track 113 3
Gas developments can assist glassmakers 507 12
Indirect heating of cullet by waste gas 193 5
Insulating for fuel savings 152 4
Looking ahead with confidence 427 10
Peripheral technology — The key to electric melting 415 10
Recovering waste heat for cullet preheating 195 5
Recuperator system specialisation 430 10
Thermal performance of cruciform regenerator packings 103 3
Zirconia fused cast refractories 109 3

Moulds

Autoswabbing improves overall efficiency 460 11
Baffle design developments 183 5
Blank mould lubricant development gives cleaner, brighter containers 459 11
Blank mould precoatings update 457 11
Glassmaker's approach to mould lubrication 455 11
Mould technology developments 34 1
Newcomer reports growing international acceptance for glass container lubricants 461 11

Plant utilities

Combined heat and power option 70 2
Compressed air safety and reliability 432 10
Computer-controlled compressors come of age 382 9
Heat from thin air 194 5
How brittle is your power supply? 69 2
Industrial cooling water appraisal 36 1
Standby power considerations for glassmaking sites 67 2
Trend to gas turbine standby power 70 2

Precious metals

Improved high temperature strength claim for ZGS platinum material 278 7
Use of platinum and its alloys in the glass industry, The 279 7

Process control

Changing face of process control 214 6
Container production line supervision 363 9
Control and drive system developments 185 5
Gas developments can assist glassmakers 507 12
Gob weight control 508 12
Infrared pyrometry in glass manufacture 220 6
Measuring coated glass temperatures with infrared pyrometers 271 7
Miniature temperature controls for colour printing 73 2
Integrated inspection machines, on-line data acquisition and production monitoring 215 6
Quality information management for glass container manufacturers 209 6
Temperature measurement and control 213 6

Quality control

Automatic container sidewall inspection 47 2
Automatic inspection of cut-to-size architectural glasses 58 2
Automating the inspection process 48 2
Container base inspection 276 7
Cutting by computer 59 2
Dimensional gauging made easy 55 2
Flat glass inspection options 60 2
Inspection equipment — A system overview 56 2
Integrated inspection machines, on-line data acquisition and production monitoring 215 6
Quality information management for glass container manufacturers 209 6
Robotic dimensional checking of glass containers 431 10
Tableware and cavity ID — Inspection possibilities 51 2

Raw materials

UK raw materials supply —1990 489 12
Economics of soda ash, feldspar and magnesium compounds 493 12

Page 504 ▶

Glass composition consistency requires suppliers' adherence to specifications 491 12
Pellets . . . The key to successful batch preparation 501 12

Recycling

Environmental issues: Problems and opportunities 165 5
Metal separator for cullet processing 139 4
Model scheme recycling success 326 8
Recycling waste laminated glass 276 7
Vibratory cullet quenchers 368 9

Refractories

Experiences with ceramically bonded materials in forehearths 97 3
Furnace construction on fast track 113 3
Thermal performance of cruciform regenerator packings 103 3
Zirconia fused cast refractories 109 3

Research

Coal-fired cyclone melting system 407 10
Oglass for quality, for Sweden 315 8
Research centre continues to meet its goals 328 8

Television glass

European expansion for Japanese TV manufacturer 232 6
Final finish for TV screens 233 6
Picture tube developments for high definition colour television 229 6

Transportation glass

Approved to European auto glazing standards 385 9
Development and manufacture of car windscreens 387 9
Evolution of DC sputter coating of architectural, auto and optical glasses 13 1
Glass — A car designer's viewpoint 383 9
High speed train demands top quality glass 386 9
PPG in the aircraft transparency business 391 9

Waste heat

Heat from thin air 194 5
Indirect heating of cullet by waste gas 193 5
Programmed approach to waste heat recovery 187 5
Recovering waste heat for cullet preheating 195 5
Recuperator system specialisation 430 10
Thermal performance of cruciform regenerator packings 103 3
